## On & Off switch

In order to achieve a switch motion, there are different methods taken into consideration to make the spindle unit stop at its 90 and 180 degrees. A two-position ball bearing was brought up into thoughts. Embedding magnets at the 45 and 135 degree angle is more effective.

### Iteration I 2-Position Ball Bearing

### Iteration II 2-Position Magnets

Magnets option is chosen for the consideration of precision and production

## Open & Enclosed space
